# PADI SCUBA DIVER

## GREAT BARRIER REEF

The PADI Scuba Diver course is a subset of the PADI Open Water Course. It is the first stepping stone to a full open water certification & ideal if you are short on time during your holiday on Hamilton Island.

### Detail:

- Streamlined shorter duration course for those with limited time – only two days.
- Requires completion of the PADI E-learning prior to commencement of course
- You will be certified to dive to a maximum of 12m accompanied by a dive professional.
- Dive Medical required prior to booking course.

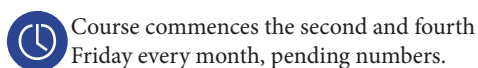

### Whats Included:

- All PADI learning materials & certification fees.
- Instruction by PADI Dive Instructor and all gear is included. (we have a retail store if you prefer to purchase equipment)
- Pool skills on the Friday within the Hamilton Island resort pool – approx four hours.
- Full day cruise to the GBR on the Saturday with two open water training dives, with all normal day tour inclusions
- Maximum of six students per course to one dive instructor

### Course Schedule & Cost:

- Requires a min of 2 confirmed participants.
- We ask you confirm attendance with full payment no later than ten days prior.
- You must complete your PADI eLearning prior to first day pool skills.

These will be emailed to you when you confirm course attendance.

- These will be emailed to you when you confirm course attendance.

## **Dive Medical requirements for PADI Scuba Diver and PADI Open Water:**

**\*Must be completed within 90 days of attending the course\***

### **ENTRY LEVEL STUDENT DIVER MEDICAL DECLARATION AND ADVICE**

Please read carefully before signing. This is a declaration in which you are informed of some potential risks involved in scuba diving and of the conduct required of you during the entry-level recreational diving certificate training program. Your signature on this statement is required for you to participate in the training offered by Explore- Hamilton Island, 227 Front Street, Hamilton island Qld 4803.

Read this statement prior to signing it. You must complete this declaration, which includes the medical questionnaire section, to enrol in the training. If you are a minor, you must have this declaration signed by a parent or guardian.

Diving is an exciting and demanding activity. When performed correctly, applying correct techniques, it is relatively safe. When established safety procedures are not followed, however, there are increased risks.

## **MEDICAL ADVICE**

To scuba dive safely, you should have an appropriate level of physical fitness and not be extremely overweight. Diving can be strenuous under certain conditions. Your respiratory and circulatory systems must be in good health. All body air spaces must be normal and healthy. A person with coronary disease, a current cold or congestion, epilepsy, a severe medical problem or who is under the influence of alcohol or drugs should not dive. If you have asthma, heart disease, other chronic medical conditions or you are taking prescription medication on a regular basis, you should consult your doctor and the instructor before participating in this program, and on a regular basis thereafter upon completion. You will learn from the instructor the important safety rules regarding breathing and equalisation while scuba diving. Improper use of scuba equipment can result in serious injury. You must be thoroughly instructed in its use under direct supervision of a qualified instructor to use it safely.

If you have any additional questions regarding this declaration or the Medical Questionnaire section, review them with your instructor before signing.

Participant Medical Questionnaire (must be completed within 90 days of course commencement) The purpose of this Medical Questionnaire is to find out if you should be examined by your doctor before participating in entry-level recreational diving certificate training. A positive response to a question does not necessarily disqualify you from diving. A positive response means that there is a pre-existing condition that may affect your safety while diving and you must seek the advice of a medical practitioner, preferably with experience in diving medicine, prior to engaging in dive activities.

Please answer the following questions on your past and present medical history by answering YES or NO. If you are not sure, answer YES. If any of these items apply to you, you must be assessed by a medical practitioner prior to participating in training. To undertake recreational diver entry level certificate training, the medical practitioner must issue you with a dive medical certificate that states that you are fit to undertake recreational diver training.
